Company Profile

OZ SMILE PTY. LTD. is a Mobile Dental Services company currently operating in WA, Victoria and headquartered in NSW.

We offer innovative dental care services through our **mobile dental clinic vans** for children at their schools, residents at retirement villages / Aged Care centres and Corporate / Enterprise Office premises

Our team comprises of highly qualified and certified Dental professionals and technicians equipped with state of the art technology in dentistry.

Schools have applauded our very beneficial program in providing convenient and comfortable dental care which children otherwise may not receive.

We do not compromise on quality and can assure the best services and care for our patients.

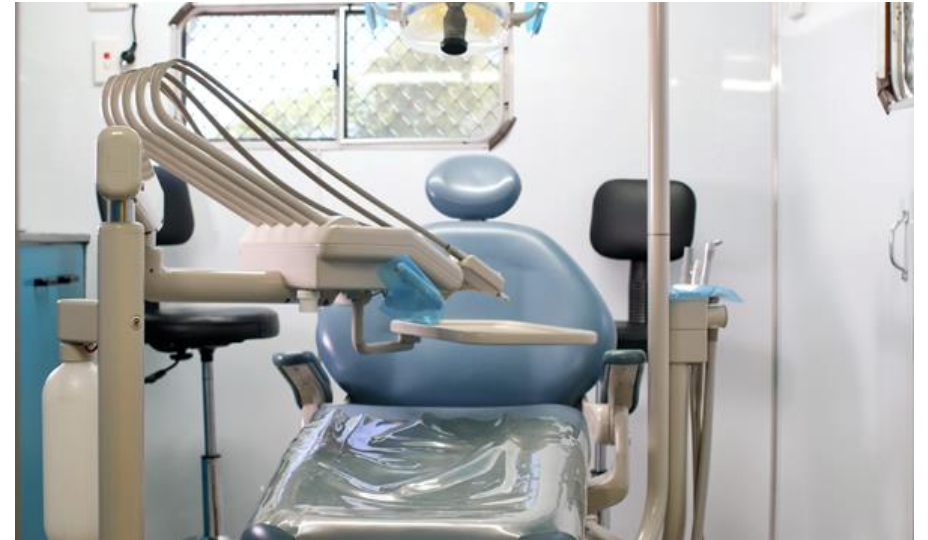

How We work

The Child Dental Schedule is an Australian government, Department of Health program for eligible children aged 2-17 that provides up to \$1,000 in benefits to the child for basic dental services that includes:

Dental Examinations
Cleaning & Scaling
Fissure sealing

Dental X – rays
Fluoride treatment
Fillings

- Under the Child Dental Benefits Scheme these basic dental services may be provided in a public or private setting
- We provide these dental services to the students of your school through our **mobile clinic van within the premise of the School and on school grounds to ensure the safety, comfort and well being of the children taking advantage of the program.**
- **Payment of benefits under the Child Dental Benefits Schedule (CDBS) is administered through the Department of Human Services - and at no cost to the School or parents.**

In Action

We deliver world class, mobile dental services to students, in the confines and security of their school grounds

We work with the school to organize a time that best suits the busy curriculum of the students

To make sure children's visit to the dentist is as comfortable and positive as possible, our staff are very friendly, fully trained and experienced. Our clinic is specially designed to provide a child friendly environment.

Our Mobile dental clinics are fully equipped with all Dental equipments including steriliser and X ray. All dental services can be performed in the van with focus on child dental care.

The child friendly interior design helps children feel comfortable without the anxiety of visiting the dentist.

Our friendly staff ensure comfort and well being of the child during treatments.

Why OZ Smile benefits School and Community

It is considered **optimal to have bi annual check ups for children** . These two important yearly visits allow dentists to monitor new developments in the child's mouth, evaluate changes in the condition of teeth and gums, and continue to advise parents on good oral care strategies.

However , in order to make this task of dental checkups easy on busy parents, we have come up with a new strategy **to bring dental checkups straight to the school through our mobile dental clinic van** in collaboration with schools. Our fully equipped mobile clinics have state of the art facilities and the best of dentists and staff who makes these checkups easy on the child. **No more waiting to get appointments, we have you covered!**

Often visit to the dentist can be a horrifying experience for some children, but visiting the dentist right at their school along with all their friends will be a positive and stress free experience!

Healthy Teeth, Happy Smiles!

We collaborate with Schools and the Community

We work in partnership and support with industry bodies and associate organizations to offer these value-added services across schools and educational institutes :

- We offer awareness programs to Schools on Dental Hygiene.
- We offer benefits for Schools through Scholarships and Event Sponsorships.
- We offer complimentary dental treatments for staff members.

We are committed to improving dental care and promoting healthy lifestyle among children.

How do we work ? OUR quick and easy process

- Rockingham Montessori School
- Langford Islamic College, Langford

We also offer EYE CARE programs

We work in partnership with schools towards a healthcare initiative called the **Kids Eye Care Program**.

The program's aim is to detect visual problems that may interfere with a student's learning abilities and subsequently hinder their academic potential. A significant number of students have visual problems that go undetected for example : **inadequate focusing and eye teaming abilities that** could lead to symptoms such as poor concentration, fatigue, headaches and unwillingness to read. An optometrist will be onsite in **our fully equipped mobile eye clinic** during school hours to provide students with a comprehensive eye examination. This will be done by appointment only and typically takes up to 10 minutes. Each attendee will receive an individual report regarding the eye health and a prescription will be provided if glasses are required.

The eye health service is available to all students and is covered by **Medicare Australia - there is no cost to the students or to the school.**

EAR CARE programs

Kids EAR Care Program.

The program's aim is to detect hearing problems that may interfere with a student's learning abilities and subsequently hinder their academic potential.

An audiologist will be onsite in our fully equipped **mobile ear clinic** during school hours to provide students with a comprehensive eye examination. This will be done by appointment only and typically takes up to 10 minutes. Each attendee will receive an individual report regarding the eye health.

The ear health checkup service is available to all students and is covered by **Medicare Australia** – **there is no cost to the students or to the school.**
